Extract from the report on samples of water by the King Institute of Preventive Medicine, Guindy.

[redacted]

Junior Certified School, and Wellesley Sanatorium Jail, Bellary.

Date of collection of water 14th August 1937

Date of receipt 16th August 1937

x x x x

The samples of raw water from the Alipuram tank is very heavily polluted besides being muddy and opaque. Vibrios were present in this sample.

The sample of water from the effluent of the Slow Sand Filter No.2 bed - worked intermittently! - shows some improvement, which, however, falls considerably short of the standard for the filtrate from a slow sand filter, worked efficiently and continuously, as slow aand filters ought to be worked. This sample also contained vibrios.

The sample drawn from the chlorinated supply to the Junior Certified School is bacteriologically safe, but aesthetically far from satsifactory. Attention is invited to the concluding sentenne under sample No.7 in this office report Cur.No.2616/36 dated 8-10-1936.

The sample drawn from the water cart, carrying chlorinated water from the school to the Sanatorium Jail, shows a slight deterioration in quality.
